Connect to your instance i-007b3cd7fcb970c9 (window-yuvarani) using any of these options

Session ManagerRDP clientEC2 serial console

Instance ID  
i-007b3cd7fcb970c9 (window-yuvarani)

Connection Type

Connect using RDP client

Download a file to use with your RDP client and retrieve your password.

Connect using Fleet Manager

To connect to the instance using Fleet Manager Remote Desktop, the SSM Agent must be installed and running on the instance. For more information, see [Working with SSM Agent](#)

You can connect to your Windows instance using a remote desktop client of your choice, and by downloading and running the RDP shortcut file below:

Download remote desktop file

When prompted, connect to your instance using the following username and password:

Public DNS  
ec2-3-109-185-191.ap-south-1.amazonaws.com  
Password copied

Username Info  
Administrator

## Remote Desktop Connection

**The identity of the remote computer cannot be verified. Do you want to connect anyway?**

The remote computer could not be authenticated due to problems with its security certificate. It may be unsafe to proceed.

### Certificate name

Name in the certificate from the remote computer:  
EC2AMAZ-B7TU86T

### Certificate errors

The following errors were encountered while validating the remote computer's certificate:

The certificate is not from a trusted certifying authority.

Do you want to connect despite these certificate errors?

☐ Don't ask me again for connections to this computer
